Education

University of Central Florida Graduated August 2026
B.S. Computer Science · B.S. Psychology *Orlando, FL*
Psi Chi, International Honor Society in Psychology (Spring 2024 to Summer 2026)

Technical Skills

Languages: TypeScript, JavaScript, HTML/CSS, SQL, Python, Java, C
Frameworks: React, Next.js, React Native, Expo, Node.js, Express, Tailwind CSS, NativeWind, Auth.js
Data & Tools: Figma, PostgreSQL, SQLite, MongoDB, Git, Netlify, Playwright, Jira

Experience

LocalFiber Jun 2026 – Present
UI/UX Design Intern *Remote*

- Design interfaces used site-wide at LocalFiber and by multiple leading internet service providers and partner companies
- Ship consumer and partner-level pages serving hundreds of users, working across product, engineering and partner teams
- Deliver designs that LocalFiber's internal development teams build from, as the reference for new and existing pages
- Keep shipped screens accessible: contrast, focus order, keyboard navigation and touch targets, working from shared design tokens

University of Central Florida Feb 2025 – Feb 2026
Research Assistant, NIH-funded cognitive aging and driving study *Orlando, FL*

- Tested 100 adults aged 65+ in an NIH study asking whether in-car sensors and cameras can catch cognitive decline early
- Ran 4+ hour sessions administering the Benson figure, LASSI-L and Craft Story batteries and reaction-time tasks
- Analyzed the results and entered them into the study database used to track decline in cognitive aptitude over time
- Guided older adults through timed, computer-administered tasks, where instruction clarity and pacing decided if the data was usable

University of Central Florida May 2025 – Dec 2025
Undergraduate Teaching Assistant *Orlando, FL*

- Graded and reviewed hundreds of assignments across two semesters for Health Psychology, a course of 300+ students

Projects

recrd.top | *Figma, React.js, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, Spotify Web API*

- Led a 5-person team to create recrd.top, a social media platform for ranking music albums
- Developed a web-scraping script to ingest 10,000+ music albums from the Spotify Web API into MongoDB
- Implemented user authentication with email verification using JWT tokens, bcrypt hashing, and SendGrid
- Reduced LCP by ~63% (3s to 1.1s) by minifying and deferring non-critical JS

Museum of Fantasy Sports | *Next.js, React.js, TypeScript, PostgreSQL, Prisma, Auth.js, Tailwind CSS*

- Built a league-history platform turning a fantasy league's seasons into browsable standings, records and rivalries
- Modelled leagues, seasons, matchups and franchises in PostgreSQL with Prisma so records survive team renames
- Implemented authentication and per-league access control with Auth.js

Wishwell | *Next.js, React.js, TypeScript, Tailwind CSS, SQLite, Playwright*

- Built a social wishlist and gifting app on a two-ground design system that stays readable in light and dark themes
- Implemented a server-enforced claim system returning different data to the list owner than to everyone else
- Wrote Playwright end-to-end tests covering the add-item and claim-gift flows

Mahou Learning | *React Native, Expo, TypeScript, NativeWind, SQLite, Reanimated, Skia*

- Designed the UI for a six-person Japanese learning app: home, companion, settings, cards and a memory minigame
- Conducted user research on spaced-repetition scheduling and home-screen retention, then rebuilt both around it
- Migrated the app's styling to NativeWind and built a token-driven theming system used by every screen
- Added the accessibility assets users asked for in research
